

IPC Care Manager Responsibilities...

“ Good management and organisational processes are crucial to make sure that high standards of infection prevention and cleanliness are developed and maintained. ”

(Health and Social Care Act 2008)

Personal Protective Equipment

- Provide an adequate supply.
- Ensure correct storage facilities.
- Ensure PPE is disposed of correctly and is not loose in outside bins.

Training

- Ensure staff have up to date IPC training.
- Ensure all staff are competent in donning and doffing.
- Ensure all staff are competent in monitoring signs of deterioration.
- Ensure senior staff have training and a clear understanding of outbreak management guidance.

Governance

- Remain up to date with local and national IPC guidance.
- Ensure policy and procedures reflect IPC guidance and legislation.
- Ensure audits are completed and action plans are evidenced.
- Cleaning schedules are in place and monitored.
- Ensure you encourage staff to get their vaccinations.

Not following national IPC guidance indicates that your service is not following the Health and Safety Act and therefore will likely be breaking your insurance cover terms.
