

Wildlife Watch

What you'll need -

- A garden
- A camera
- Binoculars if you have
- Internet to research
- Wildlife Images

Method -

Use your internet to research the following: Earthworms, wasps, bees, hedgehogs, snails, slugs, aphids, birds, frogs and butterflies.

If you have a camera and a garden ground you may be able to capture some photographic images to share with others.

Research and compile 5 minutes of information on each one discussing the importance within the eco-system. Share this and people's experiences in a meaningful way.
